DIVISION OF  
OIL, GAS & MINING

RE: *Hanging Bridge*  
Atchee Ridge Mine  
Stormwater Runoff impoundment

Dear Mr. Maxwell:

We have reviewed the proposed mine plan and have noted that a dike structure will be placed in the drainage directly effected by the mine activity for storm water and spill capture. All run on storm water will be diverted around the mine and operation areas.

In order to issue a construction permit as required by Part 1.2.2 of the Utah Code of Wastewater Disposal Regulations, we must receive specific plans (including construction drawings, exact site location, size of dike and construction materials to be employed) and specifcatons for the above mentioned stormwater and spill impoundment.

As soon as plans and specifications can be submitted to this office the plan review will proceed.

Sincerely,

Brian L. Nelson  
Public Health Engineer  
Bureau of Water Pollution Control
